education

applied mathematics b.a., computer science minor
UC Berkeley, 2017

experience

frontend engineer
UPTOP, Manhattan, NY, nov 2017 – present

frontend engineer intern
UPTOP, Manhattan, NY, jul 2017 – oct 2017

· developed the entire web frontend of https://manage.liveuptop.com using TypeScript, React, Less, Redux and other JavaScript libraries
· work closely and communicated daily with the backend engineer(CTO), product designer, and product manager to ensure the client corresponded seamlessly with the server all while the product functioned the way it was intended and matched UI/UX designs
· concurrently developing the webportal for renters https://.liveuptop.com with another frontend engineer, requiring clear communication, delegation of responsibilities, and code reviewing
· (full-stack responsibilities) completed server-side tasks with C#
· practice version control previously via SVN, currently through Git

software development intern
BlackBerry, San Mateo, CA, jun 2016 – aug 2016

· developed in various JavaScript libraries such as React, Bootstrap, and Meteor
· responsible for creating a component whose functionality was to allow users of Blackberry's project managing and chat service to send feedback to the developer team, using JIRA's API
· this feature is to be used in the product's deployment
· wrote extensive unit and integration tests using Enzyme, Chai, and Sinon for both client and server sides
· familiarized with modern workflows such as the agile framework Scrum and version control via Git
